sprinkler system using your personal computer.

**Irritrol**  
Get more done™

**Easily Identifiable!**

Uses digital photos of your own yard for zone identification

**Convenient!**

Connect to the Web to transmit schedules over the Internet for contractor or Irritrol advice and assistance

**Smart!**

Obtain online weather forecasts for zone adjustments using the Scheduling Advisor™

**Familiar!**

Easy drag and drop zone scheduling

**Versatile!**

Create automatic schedule for landscape lighting

# NOW, PC ALSO STANDS FOR PRECISE CONTROL.

Your irrigation system saves you time, water, money and hassles while keeping the exterior of your home lush and beautiful. Your landscape lighting helps keep your property safe while enabling you to enjoy your surroundings at night. Now, Irritrol® allows you to get more from your home's landscaping, irrigation and lighting investment by using your personal computer.

**Introducing PC Control from Irritrol.** Designed for all-around convenience, it features easy-to-use programming of irrigation and lighting schedules as well as status checks from your personal computer. Wireless communication makes installation fast and allows for service calls that don't require home or garage access.

**Perfect for New System Installs or as an Easy Upgrade to Your Existing System—**

PC Control installs just like a traditional controller! Plus, the simplicity of PC Control's technology allows it to work well with any standard system currently installed. Simply swap out your existing controller with the PC Control and load the software onto your PC. That means you don't have to tear up what has already been installed.

**More Precise Control of Your Irrigation and Lighting—**

Get a detailed on-screen view of your irrigation and lighting schedule. No more stumbling over boxes in a dark garage or basement to program your irrigation system. As an added benefit, you can designate a zone to run a relay to control your landscape lighting.

**Features a Scheduling Advisor™ that Saves You Water and Money—**

Recommends optimal watering schedule after considering several key environmental factors. Uses online local weather forecasts to automatically reset or recommend a revised watering schedule.

**Programming Using Actual Photos of Your Zones—**

No more guessing which zone is which. Upload actual photos of your own landscape for easy zone identification.

**PC Control combines computer and Internet technology to save you water and money. Ask your irrigation contractor about installing Irritrol's PC Control today.**

**The complete PC Control package includes:**

- 12-station indoor controller
- 2-way remote with desktop stand and USB cable
- Software on disk
